

LILJEBERGS

SS/2019 EDITION

A TRUE PASSION FOR INSECTS, NATURE AND PHOTOGRAPHY

Liljebergs is a collection of images based on my photos of insects. Behind my images are a great passion for butterflies and other insects and many years of dedication to photography. Many of the photos has been used as illustrations in a variety of books but are now mainly used as art in home and public decor. The insects that are used are mostly borrowed from varios museums and from my entomology friends and their collections.

I photograph and print everything in my own studio. Each image consists of sometimes up to hundreds of images that have been packed together with different depths of sharpness to create as detailed and realistic images as possible. This macro technique allows you to enlarge the images at great magnification without losing any sharpness or quality.

The prints are all from highend 11-color inkjet printers. The images are printed on a matte 200 gram quality paper with pigment inks of the highest quality with a very long life span. This gives a quality and durability that far exceeds traditional offset printing.

Macro photography of small insects in large magnification has become my specialty. The goal is to show nature as it looks, with the detail, sharpness and color gamut required.

GÖRAN LILJEBERG

"Through the camera lens I can see structures that are otherwise hidden to the naked eye which fascinates me."

- Göran Liljeberg

SELECTING BACKGROUND AND FORMAT

You can choose between two versions of each design. When choosing **NO TINTED BACKGROUND, NO NAME** you get a greater contrast between the insect and the background, a more graphic look. When choosing **TINTED BACKGROUND WITH NAME** the contrast is a little softer, and you get a white border around it, like a built in passepartout. A more classic look. If you choose the tinted background you will also get the species scientific name printed under the insect. We also have some prints on black background and some on green.

Our sizes:

A4, 30x40 cm, 40x50 cm, A2, 16x70 cm, 50x70 cm, 60x80 cm and mini prints in size 15x15 cm and A5. Note that not all of our prints are available in all sizes. We can also customise sizes and designs upon your request.

Our botanical range is quite new and something we are developing to be a larger part of our collection. They are photographed with the same macro technique as our bugs so they are highly detailed and in supreme quality. We plan to release new botanical prints through out the year so keep your eyes open...!

Our new dried botanicals come either on plain white background or on a darker shade of tinted background that is printed edge to edge (as shown here). There is no name printed even if you choose the tinted background.
